

Building Certifier Licence

Levels of licensing - Section 151 of the *Building Act 1975* (the Act)

Building Certifier – Level 1 - section 152 of the Act - may perform building certifying functions for all classes of buildings and structures.

Building Certifier – Level 2 - section 153 of the Act – may only:

- a. without the supervision of a building certifier level 1 - perform building certifying functions on buildings and structures having a rise of no more than 3 storeys and a total floor area no more than 2000m²; or
- b. under the supervision of a building certifier level 1 - help in assessing and inspecting all classes of buildings and structures.

Building Certifier – Level 3 - section 154 of the Act – may only perform building certifying functions on class 1 buildings or class 10 buildings or structures.

Where an applicant seeks endorsement as a Private Certifier (class A and B) the following information is required:

- Evidence the applicant holds Professional Indemnity Insurance as prescribed by the Building Regulation 2006.
- A private certifier class 'B' may apply for endorsement to issue development permits under section 160 of the Act to become a class 'A' private certifier.

Where an applicant seeks development approval endorsement:

- Evidence that the applicant has completed the course called "Issuing Development Permits for Building Work" as prescribed by the *Building Regulation 2006*, section 52(4).

Change in level of licence

This application form may also be used by a person holding an existing building certifiers licence who wishes to change the level of the licence to a different level. If an application for a change in level of licence is received and subsequently approved, the earlier licence will be cancelled and the original licence number reused. Generally, these applications must be accompanied by the full application and licence fees. However, discretion may be exercised to allow a waiver of part payment of the annual licence fee based on a pro-rata allowance for any remaining period on the cancelled licence. Please discuss this matter with the QBCC at the time of application.

Professional indemnity insurance requirements - Section 52 of the *Building Regulation 2006*

A building certifier seeking endorsement as a private certifier must have professional indemnity insurance including confirmation that non-compliant building products are not excluded from cover that provides:

(a) A minimum limit of indemnity of \$1 million for any claim and in the aggregate during any one (1) period of insurance that may arise from the performance of private certifying functions;	(b) In addition to the limit of indemnity mentioned in (a) - indemnity for costs and expenses incurred with the consent of the insurer of defending or settling a claim;
(c) Indemnity for breaches of professional duty as a private certifier arising from an act, error or omission of the private certifier after the day the private certifier was first accredited as a private certifier;	(d) If the private certifying functions are performed as an employee - indemnity to former principals, partners and directors or the employer who were, but are no longer, private certifiers.
(e) Indemnity for negligent performance of a building certifying function;	(f) At least one (1) automatic reinstatement of indemnity.

Other conditions may also apply and applicants should check section 52 of the *Building Regulation 2006*, for full details. The professional indemnity insurance must include all conditions required by the Regulation.

One particular provision allows a private certifier, who is a member or employee of a corporation or other entity, to fulfil this condition if the corporation or other entity has the required professional indemnity insurance policy. In this case, the member or employee must provide evidence of the relationship that exists with the corporation or other entity and a certified copy of their professional indemnity insurance.
